

```

#include<stdio.h>
#include<stdlib.h>

typedef struct treenode
{
    int data;
    struct treenode*
left;
    struct treenode*
right;
}

typedef struct tree
{
    struct node *root;
}tree;

void init(tree *T) {
//Set root to null}

tree create_tree(int
A[], int n)
{
    tree t;
    for(int i = 0; i<n;
i++)
        {<---Add
        nodes---->}
        // Set root to
correct node
        return(t);}

```

```

void add_node(tree *t,
int key)
{}

void del_node(tree *t,
int ind)
{
    // Should we even
implement it?
}

void any_order(tree t)
{ }

int main()
{
    int arr[] ={10, -1,
34, 1, -1, 45, 11};
    tree T;
    init(&T);
    T =
create_tree(arr,sizeof(a
rr));
    add_node(&T,90);
    add_node(&T,78);
    any_order(T);
}

```
